Your introduction to precision in guided implantology

SKY pro guide surgical tray
(instruments included)

REF SKYPROGST1

Instruments for all SKY implants
with \varnothing 3.5, \varnothing 4.0 and \varnothing 4.5.

SKY guided fixation pin
 \varnothing 1.35 mm L 27mm
REF GFPL27D135

SKY guided fixation pin sleeve
 \varnothing 1.35 mm L 6mm
REF GFSL06D135

The fixation pins enable secure fixation of the drilling template.

Principle of function

Maximum safety when reaching the drilling depth and angulation by guiding the drills through the high-precision drill sleeve.

Function description

Practical: the lower part of the tray contains ratchets and tools for inserting the implants.

One system for all SKY implants from Ø 3.5 – 4.5 mm. In addition, individual pilot holes, can also be achieved in a guided manner.

Case example: bSKY4514
